REASONS FOR ALLOWANCE

Applicant's amendment filed on 12/1/05 has been entered. Claim 20 is currently pending in the instant application. Applicant's amendment to claim 20 has overcome the rejection of the claim under 35 U.S.C. 112, second paragraph.

Claim 20 is allowed.

The following is an examiner's statement of reasons for allowance: as noted in the previous office action, claim 20 is considered free of the prior art of record because while the art teaches catheter based systems for delivery nucleic acid vectors to the heart, the prior art of record does not teach or suggest a delivery system for cardiac tissue comprising the combination of a pacing electrode, a mapping electrode, a catheter, and a reservoir containing nucleic acid vectors encoding Cx40, Cx43, or Cx45.

Please note as well, that although the applicant have stated in their prior response that two patents belonging to applicants have been issued to "essentially the same systems for delivery", neither statutory nor obviousness type double patenting applies as none of applicant's issued patents, 6,567,705, 6,665,563, or 6,801,805, claim or disclose a delivery system which comprises both a pacing electrode and a mapping electrode. Specifically, none of the aforementioned patents discloses mapping electrodes, or in particular, mapping electrodes that determine the location of cardiac tissue deficient in connexin expression. Further, none of the patents disclose the delivery of nucleic acids encoding connexins.
